SMALL CUSTOMER AGREEMENT.

FOR CUSTOMERS WHO CONSUME LESS THAN 160MWH PER ANNUM

Agreement No. _____

Representative _____

At BlueNRG, we are committed to transparent, open communication. If you ever have any questions, we're here to help.

Customer Acknowledgment

- You agree that you are duly authorised to give explicit informed consent to this contract on behalf of the company listed above, and that you are entering into this contract subject to BlueNRG's market retail contract terms and conditions which will be provided in your welcome pack.*
- You agree that you will be invoiced monthly and may be invoiced on estimate meter reads where necessary, and that invoices will be sent to the email address provided. Postal invoices attract a \$5.00 administration fee per invoice.*
- You acknowledge that your rates may change in line with BlueNRG's market terms and conditions, and may be varied to account for changes in CPI and network tariffs charged to Blue NRG by your distributor. Price variations occur once a year, and reflect any variation in pass through costs from network distributors and to reflect any changes the Australian Bureau of Statistics' Consumer Price Index. In New South Wales and South Australia, we may vary prices from 1 July of each year. In Victoria, we may vary prices from 1 January each year.*
- You have a ten day cooling off period which begins from the day you receive your customer welcome pack.*
- At the end of the supply term, the energy contract, including all product features, will continue for a further supply term, unless you advise otherwise or your contract is terminated.*
- You may be subject to demand tariffs charged by your distributor. A demand tariff is a charge that applies for the maximum electricity supplied to your premises for each day of the billing period, regardless of how much electricity you consume. If applicable, this will be charged in dollars per kilowatt of maximum demand per month.*
- If you are a United Energy customer, you may be subject to a Summer Demand tariff if you consume more than 20MWh per year at your premises. If applicable, this tariff is calculated by identifying the highest half hourly usage between 2.00–7.00pm Monday to Friday for the period between 1 November to 31 March.*
- Blue NRG offers a feed in tariff for small solar customers as follows: 5.0c/Kwh in Victoria, 5.3c/Kwh in South Australia and 5.2c/Kwh in NSW.*
